CONTENTS

Preface v

Interfacial phenomena in the solidification processing of metal matrix composites 1
A. Mortensen (Cambridge, MA, U.S.A.)

Metal matrix composites made by spray forming. 13
A. R. E. Singer (Swansea, U.K.)

A liquid metal infiltration model of unidirectional fibre preforms in inert atmospheres 19
R. M. K. Young (Didcot, U.K.)

Squeeze casting of metal matrix composites using short fibre preforms 23
G. A. Chadwick (Southampton, U.K.)

Squeeze casting of hybrid Al–SiC fibre–particle composites. 29
S. De Bondt, L. Froyen and A. Deruyttere (Leuven, Belgium)

Magnesium-base hybrid composites prepared by liquid infiltration 33
J. Schröder and K. U. Kainer (Clausthal-Zellerfeld, F.R.G.)

Segregation of magnesium in squeeze-cast aluminium matrix composites reinforced with alumina fibres . 37
Y. Le Petitcorps, J. M. Quenisset (Talence, France), G. Le Borgne and M. Barthole (Velizy, France)

High pressure die casting of fibre-reinforced aluminium by preform infiltration 41
N. W. Rasmussen, P. N. Hansen and S. F. Hansen (Lyngby, Denmark)

Numerical simulation of the injection moulding of thin parts by liquid metal infiltration of fibrous preforms 45
E. Lacoste, M. Danis, F. Girot and J. M. Quenisset (Talence, France)

Electroforming of metal matrix composite: dispersoid grain size dependence of thermostructural and mechanical properties. 51
M. Verelst, J. P. Bonino and A. Rousset (Toulouse, France)

Characterization of a C-Al metal matrix composite precursor 59
J. J. Masson, K. Schulte (Köln, F.R.G.), F. Girot and Y. Le Petitcorps (Bordeaux, France)

Mixing of powder metallurgical fibre-reinforced aluminium composites 65
J. H. ter Haar and J. Duszczyk (Delft, The Netherlands)

Manufacture of 2014 aluminium reinforced with SiC particulate by vacuum hot pressing 73
J. H. Tweed (Didcot, U.K.)

Microstructural analysis of hot isostatically pressed Al–SiC 77
P. M. Bronsveld, P. Bruinsma, J. Th. M. De Hosson (Groningen, The Netherlands), M. A. Sargent and W. H. M. Alsem (Arnhem, The Netherlands)

Wetting and interfacial chemistry in liquid metal–ceramic systems 83
N. Eustathopoulos, D. Chatain and L. Coudurier (St. Martin d'Hères, France)

Wettability of SiO_2 and oxidized SiC by aluminium 89
V. Laurent, C. Chatain and N. Eustathopoulos (St. Martin d'Hères, France)

Kinetics of gas-to-liquid transfer of particles in metal matrix composites 95
A. S. Kacar, F. Rana and D. M. Stefanescu (Tuscaloosa, AL, U.S.A.)

Silica-aluminium alloy composites: a kinetic study. 101
T. Stephenson, Y. Le Petitcorps and J. M. Quenisset (Talence, France)

Crystallization of metal matrix alloy in composites containing non-metallic particles 105
J. Braszczynski (Czestochowa, Poland)

Microstructural and analytical characterization of Al_2O_3–(Al–Mg) composite interfaces 111
R. Molins, J. D. Bartout and Y. Bienvenu (Evry, France)

CONTENTS *(continued)*

On the thermodynamics and kinetics of carbides in the aluminium-rich corner of the Al–Ti–C phase diagram. 119
A. Jarfors, H. Fredriksson (Stockholm, Sweden) and L. Froyen (Heverlee, Belgium)

Uniaxial tension and microstructure of a short alumina fibre-reinforced Al–2Mg alloy 125
Z.-K. Liu, J. Ågren and A. Melander (Stockholm, Sweden)

Influence of particle oxidation on age-hardening behaviour of as-fabricated and remelted SiC reinforced Al–1%Mg alloys 129
L. Salvo, M. Suery (St. Martin d'Hères, France), J. G. Legoux and G. l'Esperance (Montréal, Que., Canada)

Interfaces in composites of alumina in a molybdenum matrix 135
G. H. M. Gubbels (Eindhoven, The Netherlands)

Investigation of diffusion barrier coatings on SiC monofilaments for use in titanium-based composites . . . 141
K. Bilba, J. P. Manaud, Y. Le Petitcorps and J. M. Quenisset (Talence, France)

Development of a diffusion barrier for SiC monofilaments in titanium 145
R. R. Kieschke and T. W. Clyne (Cambridge, U.K.)

The effect of magnesium and nickel as alloying elements in AlCu–SiC composites 151
N. Dahl and T. E. Johnsen (Oslo, Norway)

Interface problems in aluminium matrix composites reinforced with coated carbon fibres 157
G. Leonhardt, E. Kieselstein, H. Podlesak, E. Than and A. Hofmann (Chemnitz, F.R.G.)

Aspects of deformation of metal matrix composites 161
H. Lilholt (Roskilde, Denmark)

Use of the frozen-stress photoelastic method to explore load partitioning in short-fibre composites. 173
P. J. Withers, E. M. Chorley and T. W. Clyne (Cambridge, U.K.)

Thermal mismatch dislocations produced by large particles in a strain-hardening matrix. 179
D. C. Dunand and A. Mortensen (Cambridge, MA, U.S.A.)

Micromechanical investigation of the processing and loading of fibre-reinforced metal matrix composites . 185
H. J. Böhm and F. G. Rammerstorfer (Vienna, Austria)

Deformation studies of metal matrix composites using electron backscatter patterns. 189
A. J. Wilkinson (Bristol, U.K.)

Non-linear model of the mechanical response of fibre-reinforced laminates to mechanical loading 195
U. Graham (Bristol, U.K.)

X-ray diffraction line broadening Fourier analysis of a metal matrix composite obtained by liquid infiltration 199
G. Giunchi (Novara, Italy), F. Barbieri, C. Patuelli and M. Zaffagnini (Bologna, Italy)

Thermomechanical behaviour of SiC–Al composites 203
A. Colclough, B. Dempster, Y. Favry and D. Valentin (Evry, France)

Mechanical and physical properties of squeeze-cast aluminium metal matrix composites containing 5%–30% Saffil 209
F. P. Kehoe and G. A. Chadwick (Southampton, U.K.)

The behaviour of metal matrix composites during temperature cycling 213
S. M. Pickard and B. Derby (Oxford, U.K.)

On failure processes in aluminium matrix composites reinforced with coated carbon fibres 217
G. Leonhardt, G. Wieghardt and H. Podlesak (Chemnitz, F.R.G.)

The influence of microstructure on the fracture behaviour of particulate metal matrix composites 221
P. Mummery and B. Derby (Oxford, U.K.)

Comparative evaluation of extrusion and hot isostatic pressing as fabrication techniques for Al–SiC composites 225
A. Niklas, L. Froyen, L. Delaey (Heverlee, Belgium) and L. Buekenhout (Sint-Niklaas, Belgium)

CONTENTS *(continued)*

Static and dynamic properties of squeeze-cast A357–SiC particulate Duralcan metal matrix composite . . . 231
A. Bloyce and J. C. Summers (Southampton, U.K.)

The effect of matrix composition on the mechanical properties of squeeze-cast aluminium alloy–Saffil metal matrix composites . . . 237
N. J. Musson and T. M. Yue (Southampton, U.K.)

Influence of heat treatment on the properties of short-fibre-reinforced magnesium composites . . . 243
K. U. Kainer (Clausthal-Zellerfeld, F.R.G.)

Fatigue behaviour of short alumina fibre reinforced AZ91 magnesium alloy metal matrix composite . . . 247
N. Llorca (Barcelona, Spain), A. Bloyce and T. M. Yue (Southampton, U.K.)

Zn–Al matrix composites: investigation of the thermal expansion, creep resistance and fracture toughness . . . 253
M. A. Dellis, J. P. Keustermans, F. Delannay (Louvain-la-Neuve, Belgium) and J. Wegria (Auby, France)

A test determining the ability of different materials to undergo simultaneous plastic deformation to produce metal composites . . . 259
R. Śliwa (Rzeszów, Poland)

The thermomechanical processing of Al–SiC particulate composites . . . 267
F. J. Humphreys (London, U.K.)

6061 aluminium alloy–SiC particulate composite: a comparison between aging behaviour in T4 and T6 treatments . . . 275
P. Appendino, C. Badini (Torino, Italy), F. Marino and A. Tomasi (Trento, Italy)

Recrystallization in fibrous and particulate metal matrix composites . . . 281
R. A. Shahani and T. W. Clyne (Cambridge, U.K.)

Machining of Al–5Mg reinforced with 5 vol.% Saffil and 15 vol.% SiC . . . 287
A. R. Chambers and S. E. Stephens (Southampton, U.K.)

Ball milling: an E–v–T parameter phase diagram . . . 291
E. Gaffet (Vitry-Seine, France)

Unlocking the potential of metal matrix composites for civil aircraft . . . 295
D. Charles (Bristol, U.K.)

AUTHOR INDEX . . . 299

SUBJECT INDEX . . . 301
